

# Assignment 1

August 8, 2019

Please complete the following problems.

Remember:

- clear objects from your workspace and **source** your file before you submit it.
- do not rename external files.
- do not use global paths. use **setwd()** in the console, but do not include this code in your submission.

## 1

Make a vector called **myVector** and have it store the integers 1, 2, 3

## 2

Make a string called **myString** and have it store your name.

## 3

Read in the data set called **data.csv** and store the data frame as **myDataFrame**.
